

# Opposites Attract

**Divide the word cards into three equal stacks. Each student gets one stack and the remaining stack is the lake.**

**Check your cards for matching antonyms. Place the matching sets down.**

**Take turns asking your partner for an antonym for one of the cards in your hand. For example, “Do you have the card that is the antonym for cold?”**

**If your partner has the antonym, he gives it to you and you place the matching set down. If your partner does not have the antonym, draw a card from the lake.**

**Continue until all cards are matched.**

**When you finish the game, write at least five pairs of antonyms in your Notebook.**

**V3**
